

The city of Easton has a sewage charge of \$6.90 for each 750 gallons of water you use. If you save 750 gallons of water you save an additional \$6.90 a month. The cost of heating the water for showers is more difficult to figure but a conservative estimate of savings on 750 gallons is \$5.00 a month. That's a total of at least \$15.40 a month in savings.

Your showerhead is paid for in less than a month and after that you are saving \$184.80 a year. Not bad for a showerhead that cost around \$10 and you can install yourself. If you add low flow aerators for your kitchen and bathroom faucets you will save at least another \$25 per year.

Why should you buy from Conservation Warehouse at [www.ConservationWarehouse.com](http://www.ConservationWarehouse.com)

First, all of our products are tested in our own homes and properties. They work.

Second, they save water and gas or electricity.

Third, Conservation Warehouse prices are low.

Fourth, the Kiwanis coupon code will give you 15% discount when you order.

Fifth, Conservation Warehouse will donate 15% of the price you pay to the Easton Kiwanis Foundation. The Kiwanis Club of Easton provides services to the children of Easton and the World ([www.EastonPakiwanis.org](http://www.EastonPakiwanis.org)).

**How I save money on my water, sewage, and gas or electric bills**

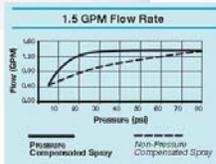

When I moved into a two bathroom house in Williams Township my daughter came by with two showerheads. "Take those old 2.5 gallon per minute (gpm) shower heads off. Try these 1.5 gpm showerheads. I got them at Conservation Warehouse. Your water pressure is low here. These pressure adjusting showerheads will save water and give you a better shower."

Five minutes later I had the new showerheads installed. With five people in the house taking five minute showers, we were saving at least 25 gallons of water a day. That's 175 gallons a week or 750 gallons in a month. And the showers did feel better.

Most of us buy our water. The more we use the more we pay. The Easton Suburban Water Authority charges \$.0047 a gallon (about half a penny for each gallon). Now \$.0047 times 750 works out to about \$3.50 a month. That's \$42 a year.

But wait a minute, the charge for sewage is also based on water usage and we pay for the gas or electricity to heat the water.

Here's an easy way to save....  
**Earth Massage Showerhead**  
 Available in 1.25, 1.5 or 2.0 gallons per minute
